

DHM DESIGN

ALEX FALES

Associate

Alex has worked on a variety of project types on the Western Slope, including recreation and public parks, neighborhood master planning, and resorts and residences. Alex is an avid rock climber that looks to the mountain terrain for excitement and challenges. Inspired by the high desert environment, he believes in providing people of all ages with access to the outdoors.

Green Roof Assemblies
Stream and Pond Systems
Master Planning
Ranch Planning
Project Management

AWARDS

CCASLA 2014 Merit Award and Downtown Colorado
Inc. Governor's Award for Excellence
True Nature Healing Arts Center

NOTABLE WORK

Hay Meadow | Eagle, CO

The 660 acres of Hay Meadow is the last remaining undeveloped parcel with the town of Eagle urban growth boundary. Designated as "Conservation-Oriented Development", our team has gone to great lengths to preserve 60% of the open space, preserve existing wetlands and wildlife corridors, and incorporate 11 miles of trails that connect the new neighborhoods to the existing trail network. DHM led the schematic design of 4 neighborhoods, each consisting of a mixture of multi-family, duplex and single family units, and incorporated a new school site, fire station site, community park, trails and a new recreation open space for the Town.

Aspen Valley Ranch | Pitkin County, CO

DHM Design is creating a master plan for the Aspen Valley Ranch, located in Pitkin County, Colorado. The 800+ acre ranch borders the White River National Forest and has been a working ranch since the 1800's. That tradition will continue with the restoration of the historic barn, new agricultural buildings, residential buildings, pasture restoration, the design and installation of a new irrigation system, and an extensive planting of Colorado natives.

Crystal River Restoration | Carbondale, CO

Aspen Valley Land Trust, along with the Town of Carbondale, hired DHM Design as part of a team to complete comprehensive river restoration for a 1.5 mile stretch of the Crystal River. DHM helped acquire \$130,000 in grant funding for the project to be implemented. The first phase of the project is focused on restoring the wetland and riparian habitat and creating passive educational opportunities with interpretive signage, trails, and gathering spaces. The second phase, which encompasses the remaining mile of the river, the team is designing a new a permanent diversion structure to improve both up and down stream aquatic habitat while still diverting water to nearby ditches.

Restone Castle | Redstone, CO

The Redstone Castle was built in 1902 for industrialist and coal magnate John Cleveland Osgood. Placed on the National Register of Historic Places in 1971, the Castle provides a unique glimpse into the personal styles and social culture of America's elite at the turn of the 20th Century. DHM has helped the property owners with the land use approvals process, including entitlements, rezoning, and public outreach, as well as master planning for overall improvements and stewardship of the site.
