

CHARLIE KEES

Associate Principal | Manager of the Bozeman Office | PLA | LEED AP

EDUCATION

B. of Landscape Architecture, University of Florida, 2002

MOST NOTABLE WORK

Bozeman Ponds Expansion

Charlie is the project manager leading the effort to expand the existing Bozeman Pond Park as part of the Bozeman Parks bond initiative. The project includes construction drawings, construction management and City approvals.

Portland to Milwaukie Light Rail

DHM Design and artist Tad Savinar are collaborating on plans for a new light rail system running south out of Portland to Milwaukie. Travelling via light rail has long been a staple of Portland culture and the project will expand and improve the accessibility of the popular form of transportation. The new system will connect the center of Portland with downtown Milwaukie through working class neighborhoods, and light industrial zones. The design concept is that each rail station is a unique expression of the neighborhood that the light rail passes through.

REGISTRATION AND BOARDS

Registered Landscape Architect CO, MT, ID

Chair Carbondale Planning and Zoning Commission 2008-2015

Carbondale Affordable Housing Advisory Board 2009

Carbondale Highway 133 Project Leadership Board 2011-2012

State Highway 133 Corridor Improvements

DHM worked closely with the Town of Carbondale to implement the Town's vision for the improvements north of Main Street along both sides of SH 133 to the Roaring Fork River Bridge. The Board of Trustees and the community invested significant time in discussing the design direction for this corridor through both the Comprehensive Mater Plan and the PLT process, and DHM Design helped take their vision and decisions forward. For the overall landscape theme, the Town preferred pockets of landscaping at key locations such as intersections and gateways, which provide ease of maintenance while achieving a high level of aesthetic design. Early on DHM Design conducted an initial analysis of irrigation requirements for the corridor, so that pump designs and other considerations for the irrigation system would adequately cover the distance of the corridor from Main Street to the bridge. The maintenance requirements were a critical consideration in the design process; close coordination with Town Public Works Staff was vital for the long-term success of the project.

Charlie has been a project manager on a broad range of projects and has a strong background in design, hand graphics and computer-aided design technology. He has a passionate interest in sustainable design, and is committed to a design process that strives to balance site ecology with human interaction and aesthetics. Charlie's knowledge of innovative materials and technologies allows him to integrate new ways of thinking into every project while still being mindful of budgets and other practical realities. Charlie currently manages the Bozeman, Montana office and is a LEED accredited professional.
