

# DAVE CARPENTER

Principal | Registered Architect, Colorado | Registered Landscape Architect, Colorado

## EDUCATION

M. of Landscape Architecture, University of Colorado, Denver, 1987

B. of Architecture, Ball State University, 1981

BS. in Environmental Design, Ball State University, 1981

## MOST NOTABLE WORK

### Lift One Neighborhood - COWOP Master Plan

This project encompasses approximately 8 acres at the base of Aspen Mountain which includes the original lift. It is a public/private partnership between the City of Aspen, the Aspen Ski Company and 2 hotel developments. DHM provided planning, design, and graphic support to a 27 person citizen's committee throughout a 6 month public process (COWOP); participating in weekly meetings, design charrettes, and presentations. DHM generated products based on direction given by the COWOP group, producing site plan studies, graphic visualizations and submittal documents for the agreed upon plan.

### Breckenridge Riverwalk

Beginning in 1991, Dave has assisted Breckenridge with the design, construction and restoration of the Blue River, which runs through the center of town. The project continues to evolve, but initially included civic/open spaces along the river, pedestrian and auto bridges, street improvements, and a summer season performing arts center.

### Wildhorse Ranch

*ASLA Award of Honor, Analysis & Planning 2007*

*ASLA Oregon Award for Excellence 2008*

Working as a part of a team lead by artist Tad Savinar, DHM has developed a ranch master plan for approximately 5,000 acres in southeastern Oregon. Located in the heart of the Steens Mountains, the site is surrounded by cattle ranches that have been in operation for several generations. The site development includes working ranch facilities, main residence, artist retreat, and the restoration of eroded drainage ways to reestablish important wildlife habitat.

### Aspen Community Campus

*CCASLA Merit Award for Design 1999*

*CCASLA Land Stewardship Award 1999*

*CCASLA Merit Award 2008*

This planning/design effort required an ability to integrate new facilities and amenities within an existing framework and to work with the site's steep topography and native gambel oak stands. The plan has many parts: Moore and Iselin Fields, Iselin Ice Rink and Pool, Aspen High School Track & Field Addition, and the campus core.

Being a landscape architect, urban designer and registered architect, Dave takes a holistic approach to planning and design. His philosophy revolves around understanding the built environment as a response to natural and cultural conditions. During his career, he has been involved with numerous, award-winning, planning and design projects throughout North America. His projects have been adopted, built, and become a source of pride in their communities. Dave's passion lies in developing creative thought and encouraging all who he works with to find the hidden possibilities in the midst of practical challenges.
