

## DHM DESIGN

# EMILY HARRISON

Designer

*Emily's background as a biologist frames her thinking today as a designer. She is passionate about the environment and in her work strives to create transformative experiences that span the disciplines of art and ecological design. She finds inspiration in the challenges of adapting to the global challenges of climate change as well as the subtle ways in which landscape and culture inform one another.*

## ABOUT

### EDUCATION

B. of Science  
University of Nevada, Reno, 2011  
M. of Landscape Architecture,  
Colorado State University, 2015

### AWARDS & AFFILIATIONS

Bosten's Living w/ Water Design Competition  
Semi-Finalist | Built  
Health One Initiative  
Honored Speaker

### RECENT PROJECTS

Basalt Community Campus; Basalt, CO  
Eagles Rise Ranch; Snowmass, CO  
Junebug Farms; Eagle County, CO  
Keystone Parking Lot H; Keystone, CO  
Leach Property; Basalt, CO  
Loop PDX Competition; Portland, OR  
Malolo House; Montecito, CA  
Marble Base Camp; Marble, CO  
S. Aspen Street Townhomes; Aspen, CO  
Warm Springs Mitigation Bank; Warm Springs, CO

## NOTABLE WORK

### Aspen Valley Ranch | Aspen, CO

DHM Design is creating a master plan for the Aspen Valley Ranch, located in the heart of the Roaring Fork Valley. The 800+ acre ranch borders the White River National Forest and has been a working ranch since the 1800's. That tradition will continue with the restoration of the historic barn, new agricultural buildings, residential buildings, pasture restoration, the design and installation of a new irrigation system, and extensive habitat environments.

### Fisher Ranch | Eagle County, CO

DHM Design developed a master plan for this 143 acre ranch that lies within the western Colorado mountains. A 3/4 mile stretch of Gold Medal waters runs through the heart of this property, offering extraordinary fishing access and providing inspiration for the development of the ultimate fishing retreat. DHM Design is working with The Aspen Valley Land Trust, which has a conservation easement on the property, to protect the riparian ecosystems and surrounding high desert habitat, but still allows for development within specific building envelopes. The base camp of the site includes a fishing pond, a habitat pond, connecting riparian stream, a ranch manager house, and fishing cabin. A northern parcel is optimally sited for the primary residence of the property with year round solar exposure and expansive views to the mountains. The Fishing Cabin was officially certified as LEED Platinum and the residence was certified as LEED Gold.
