

## DHM DESIGN

### ERIC GIBERSON

Landscape Architect | LEED Green Associate

*Eric recently moved to Denver to work in an area that values environmentally friendly design and is surrounded with inspiration. Eric enjoys all aspects of design, from public speaking to drafting support documents for community approval and brings a creative energy and hard work ethic to our team. Eric's primary focus at DHM has been on public parks, trails and open space. When he is not creating outdoor spaces, he often is using them, whether it is hiking in the mountains, playing basketball in the park, or throwing the frisbee with friends.*

## NOTABLE WORK

### Silverthorne Parks | Silverthorne, CO

DHM Design was selected as a consultant to move forward with master planning and final design of Arctic Placer Park and Rainbow Park West Entrance. DHM facilitated and participated in several public outreach events, design charrettes with the local schools, and public meetings to gather valuable input.

### Eagle Valley School District Planning | Eagle, CO

As part of the design team lead by the DLR Group, DHM Design is assisting with landscape architectural design services for the Eagle Valley School District which consists of six schools. Our tasks are to provide site/landscape schematic design, design development, construction documentation, bid-period services, and sitework/landscape construction review. Ballfields, play yards, pedestrian areas and general landscape areas are all being developed in the master planning process. Our unique challenge is to address in creative ways what the project stakeholders desire for the 3rd Street Campus pedestrian areas and plazas, landscape and play yard. Currently, rendered schematic design plans are being developed that look at different possible arrangements and theming of the play yard, landscape and pedestrian areas.

### Bohn Park | Lyons, CO

Bohn Park was one of the parks in the Town of Lyons parks that was destroyed by the 2013 floods. DHM evaluated the extent of the flood damage in relation to pre-flood conditions, including FEMA damage assessment documents, and conducted a robust public engagement process that allowed for the entire community to get involved with flood recovery planning of this park. The public process was extensive and often sensitive, garnering more comments on a DHM managed project web site than any other we have maintained. In the end, community support for the project was attained and the residents were very excited to see that their voices were heard and incorporated into the final plans. Plans for enhancing Bohn Park, instream recreation opportunities, trails and upland park recreation opportunities were developed. The 35 acre Park will have instream improvements, river access that supports fishing habitat, two baseball/softball fields, batting cage, playground, multi-use soccer field, custom restroom and shade shelters, picnic areas, Lyons Dirt Jump Bike Skills Park, Dog Park, and 3 multi-use sport courts.
