NOTABLE WORK

Bohn Park | Lyons, CO

DHM Design worked on the final detail design which included final construction documents, drawings and specifications for the construction of Lyons Bohn Park based on the 30% concept plan recently completed as part of the Lyons Parks Flood Recovery Planning Process. The final design addressed goals and priorities associated with the Parks Flood Recovery Planning Process, FEMA Project Worksheets and Project Scopes, the Lyons Recovery Action Plan (LRAP), associated Program Development Guides (PDG's), existing Town master plans, comprehensive plans and other relevant documentation and studies. DHM assisted the Town of Lyons through the bidding process and with associated construction administration related to the design as required.

Eagle Valley School District Planning | Eagle, CO

As part of the design team lead by the DLR Group, DHM Design is assisting with landscape architectural design services for the Eagle Valley School District which consists of six schools. Our tasks are to provide site/landscape schematic design, design development, construction documentation, bid-period services, and sitework/landscape construction review. Ballfields, play yards, pedestrian areas and general landscape areas are all being developed in the master planning process. Our unique challenge is to address in creative ways what the project stakeholders desire for the 3rd Street Campus pedestrian areas and plazas, landscape and play yard. Currently, rendered schematic design plans are being developed that look at different possible arrangements and theming of the play yard, landscape and pedestrian areas.

Solstice Planned Community | Littleton, CO

Successful Community Planning and Entitlement projects require an understanding of the local jurisdictional requirements as well as the requirements of other local, state, and federal agencies and stakeholders. The level of understanding that is required necessitates the involvement of an multidisciplinary consultant team comprised of Land Planning, Civil, Transportation, Environmental, Legal and Community Outreach expertise. DHM's success as Land Planning consultant is a result of our understanding of the roles and responsibilities of the project team and our ability to work closely with the team members sometimes in a leadership capacity and other times in a supportive role.
