NOTABLE WORK

Tomorrowland - Shanghai Disneyland*

Tomorrowland, within the new Disneyland Resort Shanghai China, is a world of the future that celebrates the connections between Man, Nature, and Technology. Designed around three distinct typologies - BioTopia, Neo-Cretaceous, and TechnoGardens - the lush flourishing landscape of Tomorrowland will provide a variety of beautiful, comfortable, inspiring and creative spaces for park guests. The use of local plant materials, in addition to marshland and freshwater landscapes will help distinguish Tomorrowland from other areas in the park. More than anything guests will be invited to interact with technology and nature in a variety of manners hoping to challenge and redefine roles and responsibilities with the landscape.

Project

DHM Design is currently advancing the existing concept and schematic plans through public participatory design activities to design development and an overall 100-acre Astoria Park Master Plan. We will then further develop the 5-acre hot springs pool complex to detailed construction drawings, construction documentation and bidding and finally, construction administration.

**While at another firm*

RECENT PROJECTS

- Astoria Hot Springs Park; Jackson, WY
- Private Residence at Yellowstone Club; Yellowstone, WY
