NOTABLE WORK

Margaret Carpenter Park Site Amenities | Thornton, CO

This \$12 million project provides the finishing touches to the approximately 150 acres that surround the existing Margaret Carpenter Recreation Center in Thornton Colorado and is intended to be the flagship park and recreation complex in the City of Thornton. The multi-use fields and trails that currently occupy the site are now accompanied by the many new recreational and entertainment amenities.

Croke Reservoir | Northglenn, CO

CCASLA Award 2009

DHM provided design services for the development of a pedestrian corridor to accommodate comfortable and safe circulation adjacent to this reservoir. The reservoir serves as a fishing spot and wildlife habitat. Design services included trail alignment design, landscape design, lighting, irrigation, grading, signage, and specialty amenity design. The project included extension of the reservoir embankment to stabilize the shoreline as well as enhancements to the park area.

East Lake Heritage Trail | Thornton, CO

DHM was engaged by the City of Thornton to implement the Heritage Trail concept on a one mile section of existing trail that parallels the Lee Lateral Irrigation Ditch between Colorado Boulevard and York Street, near the historic town of Eastlake. In addition to upgrading this very active trail section with a new concrete trail, shade shelter and picnic tables, the design is also intended to celebrate the heritage of the Town of Eastlake and its historic impact to the area with its once important connection to the Union Pacific Railroad line, it's agricultural influence and the role it played in bringing water to the area through one of the many gravity fed delivery systems that are still in use today.

Trail Winds Skate Park | Thornton, CO

DHM provided consulting and design services for a skate park, parking, signage, grading, and drainage within the existing Trail Winds Park in Thornton, Colorado. Design services were also provided for the adjacent dog park.
