TODD MYERS

Visualization and Web Site Specialist

Todd joins the Durango studio team with expertise in 3D visualizations and website development. He holds a degree from Colorado State University – Pueblo and has lived in Durango for 8 years. Todd combines creativity with practicality to inspire and inform his design processes. In his free time, he enjoys spending time outdoors, working on personal art projects and spending time with his family.

ABOUT

EDUCATION

B. S. Art; Colorado State University - Pueblo,
2000

Certificate in Modeling and Rendering Maya
The Art Institute of Colorado- Denver,
December 2009

AREAS OF EXPERTISE

3D Modeling and Visualization

Graphic Renderings

Visualization

NOTABLE WORK

Albert & Bessie Kronkosky State Natural Area | Pipe Creek, TX

Todd provided both 2D CAD and 3D support for a large state park project, further advancing his AutoCAD skills. He utilized various 3D tools and techniques, including photo-matching 3D content into 2D photographs for composite visuals. The project emphasized motion graphic renders, with Todd leveraging video editing software to create immersive experiences. He incorporated layout, planting, material, and contextual elements to help the client visualize the space. Additionally, he generated detailed plan renders that showcased key areas of the site from an overall perspective.

World Springs | Dallas TX, Houston TX

Todd provided comprehensive 3D graphic rendering support, transforming 2D CAD site plans into detailed 3D visualizations. He integrated layout, planting, material, and contextual details to enhance the client's ability to envision the space's potential experience. Todd also produced motion graphic walkthroughs highlighting key areas of the sites. Additionally, he developed a website to showcase the conceptual renders, offering an accessible platform for stakeholders to review and interact with project visuals.

Camp Colton | Flagstaff, AZ

Camp Colton is a residential environmental education center that is owned by the Flagstaff Unified School District. The program was created in 1971 to introduce children to the local environment and increase their understanding of science and nature through outdoor experiences. DHM along with their AE team conducted on-site visioning sessions with the students, staff, master plan committee members and board members of the Friends of Camp Colton. They also conducted a full site inventory and analysis which will be used for developing a camp master plan. This is vital in continuing the program for the next 50 years, with opportunities to expand their programs on campus to include high school camp experiences, day trip experiences for elementary school students and expanded rental opportunities which will bolster their financial sustainability.
